

Harshkumar Degamadiya

Ahmedabad | +91-823-813-6766 | harshkumardegamadiya@gmail.com | [Linkedin](#) | [Portfolio](#)

Summary

Experienced Senior Data Analyst with a strong background in Python and SQL, specializing in automating data processes and enhancing analytical capabilities. Successfully implemented a company-wide time tracking system and replaced costly BI tools with open-source alternatives, significantly improving efficiency and reducing costs. Proven track record in developing data-driven solutions that streamline operations and support strategic decision-making. Eager to leverage analytical expertise to drive insights and improvements in a dynamic organization.

Skills

- **Languages:** Python, SQL
- **Tools & Frameworks:** PowerBI, TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, OpenCV, NLTK, Streamlit
- **Technical Skills:** ML algorithms, NLP, Data Preprocessing, Feature Engineering, Statistical Analysis, Scripting and Automation, web scraping
- **Soft Skills:** Leadership, Teamwork, Writing, Communication, Time Management

Work Experience

R S Patel & CA

Aug 2025 - Present

AI / ML Developer

Ahmedabad

- Built a data analytics platform that ingests accounting and ERP datasets, automatically cleanses and validates data, detects discrepancies and duplicates, and generates analytical reports for purchase, sales, tax, and compliance, allowing the finance team to review data faster
- Developed domain-specific analytical engines implementing multiple audit and verification checks commonly used in financial review and compliance processes, enabling faster identification of anomalies and data quality issues.
- Created machine-learning models that predict commodity prices and rates from historical procurement and transaction data, supporting forecasting and helping the procurement team make more informed buying decisions
- Engineered a bank-statement forensic analysis system that uses Transformer models to extract statements, classify transactions, standardize data, detect anomalies, and generate forensic trails, cutting manual review time and improving audit accuracy
- Developed a tender intelligence platform with Django that automatically analyzes tender documents, extracts requirements, identifies risks, assesses compliance, summarizes key points, and produces decision-support reports, streamlining the tender evaluation process
- Built and deployed cloud-hosted AI assistants that analyze large government financial datasets, generate insights, answer user queries, and produce analytical summaries, enabling finance teams to quickly identify budget trends and make informed decisions
- Designed and implemented internal workflow management applications with document tracking, article management, process automation, and operational reporting features, using Django and Streamlit, which reduced manual handling time and improved reporting accuracy
- Architected scalable data pipelines for extraction, transformation, validation, reporting, and AI-driven analysis with Python, Django, and cloud services, resulting in faster data processing and more reliable analytics for business users

IMS Decimal

Apr 2024 - Aug 2025

Senior Data Analyst

Ahmedabad

- Automated data scraping processes using Python and Pandas, assisting the Recruiting and Payment teams in streamlining their workflows
- Implemented open-source BI tools to replace PowerBI, enhancing analytical capabilities and reducing software costs for the company
- Developed an organization-wide Time Tracker application in Python that automatically logged employee work hours, breaks, and app usage; integrated the data with PowerBI for daily updates and real-time reporting, providing detailed productivity analysis
- Developed an interactive sales dashboard with real-time updates using HubSpot data, improving decision-making efficiency for all IMS Group subsidiaries.
- Developed an internal LLM platform using LLaMA and OpenAI APIs, storing indexed files in a PostgreSQL audit-ready database; the system improved file-retrieval accuracy and reduced search time for staff
- Developed and integrated a Social Media Dashboard consolidating LinkedIn, YouTube, Instagram, and website data, which provided the marketing team with real-time insights across all 5 brands owned by IMS Group, leading to improved performance tracking and more informed strategic decision-making

Adani AI Labs (Sibia Analytics)

Feb 2023 - Jan 2024

Executive Trainee: Data Scientist AI/ML

- Developed a Material theft detection system for a client, reducing material loss by 50% through Statistical Analysis, Feature Engineering, and Machine Learning
- Forecasted inventory levels using advanced statistical models and time series analysis, improving operational efficiency by 20% and enhancing supply chain management

- Automated LinkedIn profile scraping and job-description analysis with a Python script leveraging BeautifulSoup and spaCy NLP, streamlining the recruitment process and improving matching accuracy
- Built a duplicate and fraud detection algorithm using computer-vision techniques in PyTorch and OpenCV, improving claim-validation accuracy and lowering false-positive rates by 20%
- Developed a cement-price prediction model with gradient-boosting regression on market data, delivering forecasts up to three days ahead to help stakeholders make informed pricing decisions
- Created and trained an OCR model for passport recognition, achieving higher accuracy than previous models, resulting in improved efficiency and accuracy in passport data extraction
- Developed a data processing and analytics module using Python and Matplotlib, which enhanced decision-making by integrating and analyzing data efficiently, reducing processing time by 30%

Appsnergies

Jun 2022 - Aug 2022

Business Analyst

- Implemented a comprehensive user feedback dashboard using Matplotlib and Pandas, resulting in a notable reduction in customer complaints and a significant improvement in user satisfaction

Megatrend Fabcon PVT. LTD.

Apr 2022 - Jun 2022

MIS Designer and ERP developer

- Standardized data processing methodologies to streamline product fabrication workflow, enhancing manufacturing efficiency

Education

Adani Institute of Digital Technology Limited

Jul 2021 - May 2023

PGDM, Big Data Analytics

Gujarat University

Jul 2018 - May 2021

Bachelor of Science, Statistics

Certifications

- **Applied Data Science Lab: WorldQuant University**
- **Python and Statistics for Financial Analysis**
- **Applied AI Lab: Deep Learning for Computer Vision: developing expertise in CNNs, object detection, and model deployment**
